### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

It should be noted that upon further consideration and in light of amendments in the instant application as well as copending applications the double patenting rejections have been withdrawn. The examiner believes a special note should be included regarding copending application 10/052,806. These claims appear almost identical except for one limitation. In 10/052,806, the limitation is "a reaction system configured to stop movement of the pivot arm toward the base assembly upon detection by the detection system of the one or more dangerous conditions". The corresponding limitation in 10/052,273 reads, "a reaction system configured to urge the pivot arm away from the base assembly upon detection by the detection system of the one or more dangerous conditions".

In this case, the broader claims in 10/052,806 are anticipated by the more narrow 10/052,273 claims. The limitation "configured to urge the pivot arm away from the base assembly" effectively reads on "configured to stop movement of the pivot arm toward the base assembly", that is, if the pivot arm is urged away from the base assembly then the movement of the pivot arm is also stop from moving toward the base assembly.

However, the reverse is not true. The claims of 10/052,806 do not read on the claims of 10/052,273 because stopping movement of the pivot arm toward the base assembly does not include movement away from the base assembly. Therefore, the instant claims (10/052,273) are currently not rejectable under double patenting with application 10/052,806.
